

RELIABILITY. EXCELLENCE. PERFORMANCE.

Industrial Specialty Crafts provides best-in-class soft craft services supporting maintenance, turnarounds, and capital projects for owners, operators, and construction companies since 2008.

More than **7,000,000** hours without an **OSHA recordable incident** since August 2020!

RESPONSIVE

Quick, flexible, nimble, innovative, available, and ready to work.

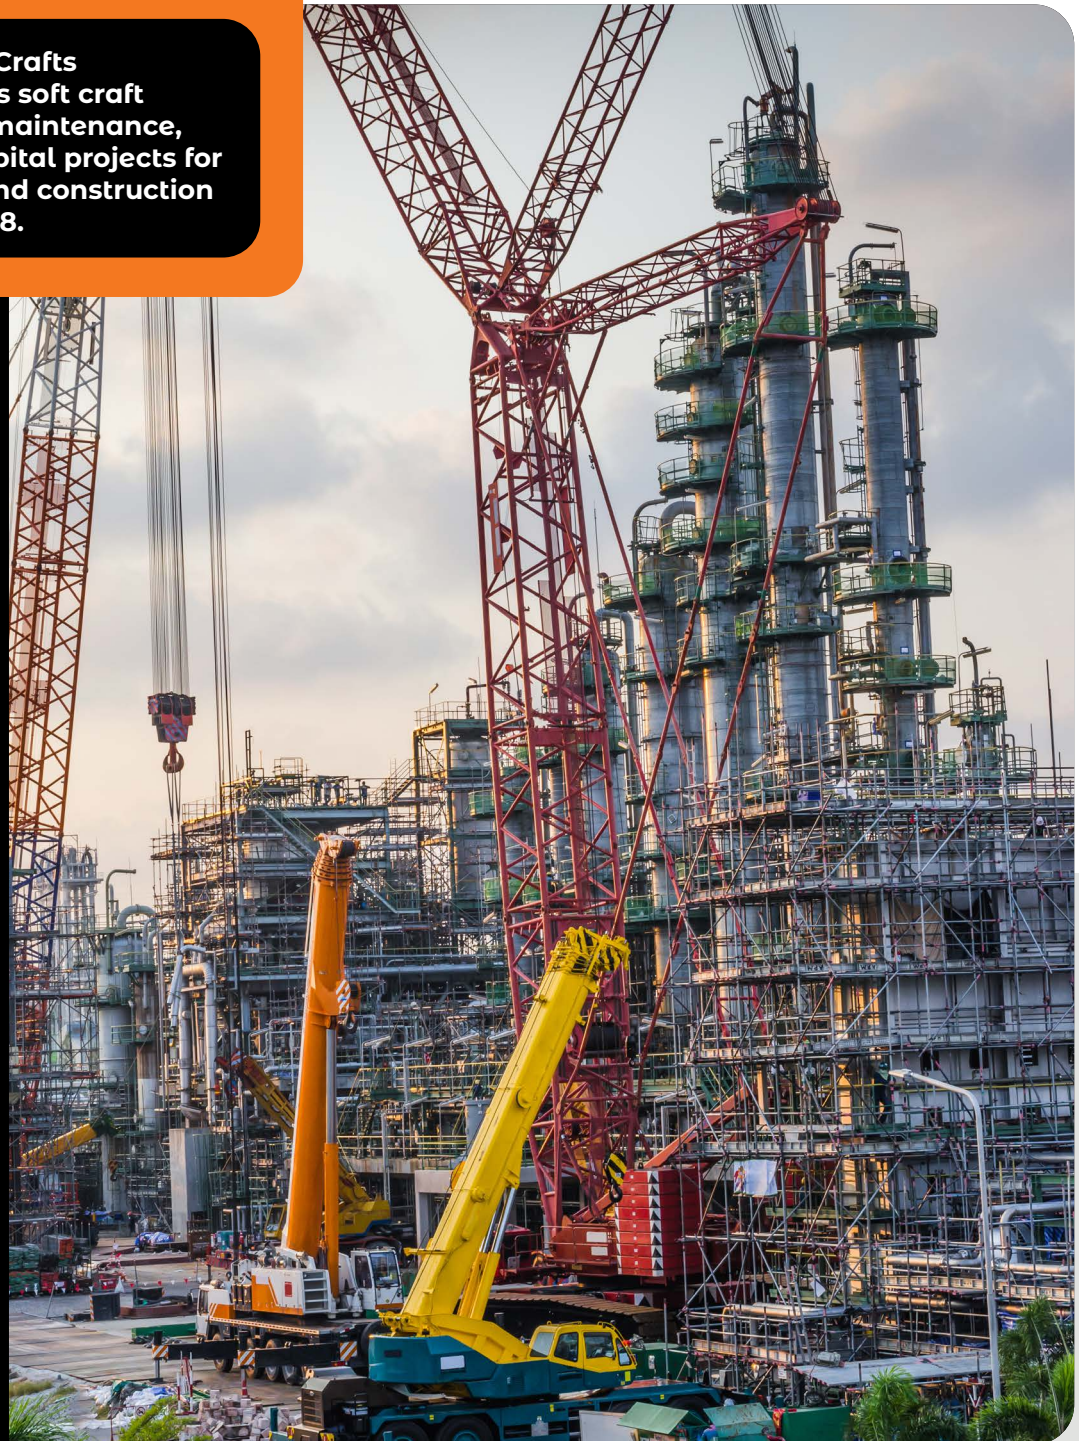

ECONOMICAL

Integrated, full-service, controlled, and high-performance.

PREDICTABLE

Skilled workforce, safety culture, quality driven, and successful.

Supporting industrial facility owners, construction companies, and service providers with a full menu of specialty craft services.

Proven Specialty Craft Services

Our customers obtain high-performance construction, maintenance, and turnaround project success with a lower cost, better safety, and the ability to optimize ongoing production operations.

Scaffolding Services —

We provide safe access solutions utilizing the latest technology and material systems. Our experienced teams design and manage safe, productive scaffolding solutions for a variety of industrial applications. Material management is addressed at the work site, with reporting systems that include inventory management, utilization and standing scaffold days.

- Inventory Management
- Engineered Scaffolds
- System Scaffolds
- Suspended Scaffolds
- Power Assisted Lifts

Insulation Services —

We provide construction and maintenance support for thermal protection, maintaining operational temperature requirements for process systems and worker protection. Our Insulation services enhance the optimization of their facilities, provides a safe work environment for all employees, improves operational integrity, and enhances energy efficiencies.

- Insulation Management
- Energy Conservation
- Process Optimization
- Personnel Protection
- Condensation Control

Thermal Insulation Blanket Services —

We design, produce, and install premier industrial insulation covers and blankets for you to use. These covers can insulate heat in many different situations. So let us help you achieve greater efficiency, safety, and cost savings in your operation.

- Easy Remove & Replace
- Precision Fabrication
- Accurate Fit and Performance
- Flexible, Multi-piece Designs
- Durable and Long Lasting

Coating and Lining Services —

Industrial facilities frequently have accelerated corrosion and coatings issues affecting plant reliability and asset life cycle cost. At ISC, we have systems and long-term strategies designed to optimize facility asset protection at the lowest total life cycle cost. Our asset reliability programs coupled with our highly trained field coating expertise, provides the solutions for our customers.

- Coatings Management
- Atmospheric Coatings
- Internal Linings
- Metalizing
- Surface Preparation

Fireproofing Services —

ISC provides comprehensive thermal protection and insulation services to our customers. Cementitious, intumescent, polymer, with spray and trowel application systems that can be effectively provided to fit our customers' specific needs/options.

- Cementitious Solutions
- Intumescent Solutions
- Polymer Solutions

Abatement Services —

Our proven lead and asbestos processes combined with significant experience enables us to address complex and highly technical abatement work scopes. Design and construction of the appropriate containment to safely avoid exposures to individuals and the environment. We can effectively address total demolition projects or efficiently provide needed small repair for both lead and asbestos abatement

- Asbestos Abatement
- Lead Abatement

Multi-Craft Bundling Services —

ISC can provide effective and efficient specialty craft bundling using proven processes with safe, productive, and quality results. Multiskilled craft professionals can facilitate craft headcount reductions, lower indirect cost, increase "time on tools" efficiency and enhance planning/scheduling processes. Corrosion Under Insulation (CUI) projects is a cost-effective opportunity for bundling services and implementing a multi-craft concept. Contact ISC to discuss the benefits of bundling work scopes and driving higher levels of execution efficiency.

ONE CALL AND ONE INVOICE FOR ALL SPECIALTY CRAFT NEEDS.
